

HOME- WORK TASK 1

As part of our Polar Regions topic, we would like to create a Year 4 'waddle' of penguins!
Your task is to create a 3D model of a penguin no smaller than 20cm for display.

Look on the internet to get ideas for different species as penguins have a variety of coloured beaks, feathers and 'hair'.

You can choose the size of the model and the materials that you use to make it with. Look on the back of this sheet for some ideas. Have fun!

Please bring your model to school by Monday, 9th February.

HOME- WORK TASK 2

Design a pair of snow boots for a modern day Arctic explorer. What materials would you use?
What innovative features will they incorporate?

Using an A3 sheet of card or paper, show the planning process. You can include labelled diagrams, fabric samples and if you want to, you could even make the final product!

Please bring your design back to school by Monday, 23rd March
