

Year 6 Trinity term

Pick and Mix Grid

Things are a little different this term with so many things going on. As such, you have four ongoing tasks which you are all expected to complete.

	English	The Arts	Science	Geography
Ongoing tasks	<p>Research, write, present and illustrate your family member's biography.</p> <p>We will give you plenty of time in class sessions— but any 'extra' details can be done at home.</p>	<p>Learn your part for <i>An Inspector Calls</i></p> <p>This includes all the songs, actions, your lines, knowing where you should be and what is happening in the story.</p> <p>Performances: Wednesday 17th June, 7pm Thursday 18th June, 7pm</p>	<p>Following the work we will do in class on the circulatory system, produce an illustrated flow diagram to show how our body transports food, oxygen and waste around the body in the blood. OR</p> <p>No one has ever seen a dinosaur. Research and sketch the skeleton of a dinosaur of your choice. Next to it draw an 'artists impression' of what your skeleton looked like when it was alive.</p> <p>Due 22nd June onwards</p>	<p>Use an ordnance survey map or the internet to look at the area around where you live. Look at the features/map symbols/contours/roads/paths/land use.</p> <p>Present your findings in an interesting way.</p> <p>Due: 22nd June Onwards</p>

Take your pick from the tasks above. We expect most of you to do 2 or 3 over the term—please do not try to do all of them! Bring anything you have into school on the **24th of June** and we will share it together.
